Local Chapter, O.E.S. Honors Worthy Grand Matron

Mrs. Helen McGhee Honored at Impressive Homecoming

St. Hilda's Chapter, Order of the Eastern Star, held a special meeting on Thursday, June 27th, to honour the homecoming of Mrs. Helen P. McGhee, Worthy Grand Matron of the Grand Chapter of Alberta.

About 80 visitors from Calgary, Carstairs and Olds were present and two candidates were initiated.

A beautiful floral addenda was presented when Mrs. McGhee was invited to enter the "Garden of Love." Flowers of each color were presented to her, and Mrs. Lantz (worthy matron) presented her with a bouquet of red roses on behalf of the Chapter.

Mrs. McGhee was elevated to this, the highest office within the gift of the Grand Chapter of the Eastern Star in Alberta at their annual session in Lethbridge on June 6th. Following this, she had visited the Grand Sessions in Boise (Idaho), Vancouver, B.C., and Bellingham (Wash.).

Mrs. Mildred Lowrie of the local chapter was also presented and honored as Grand Adah of the Grand Chapter of Alberta.

Among the distinguished guests were Mr. W. P. Niven, Worthy Grand Patron; Mrs. Blair, Past Grand Patron; Messrs. Blair, Duff and Hughes, Past Grand Patrons; Mrs. Sparling, Grand Treasurer; Mrs. Hughes, Grand Conductor, all of Calgary; and Mrs. Hammer (Olds), Grand Marshal; Mrs. Lowrie, Grand Adah and Mrs. Richard, Grand Electa.

Mrs. McGhee thanked the Chapter for their kindness and expressed her appreciation of the splendid response.

Main Thoroughfares Oiled

The Town Council in connection with Mr. Geoff Morgan and a Turner Valley concern came to a decision recently to have the main thoroughfares of Didsbury oiled for the summer.

The annual event took place Tuesday afternoon and Wednesday morning, the scarifying process having been completed on Monday. The area covered includes main street from Hespeler street on the north to Hammond street on the south, then west on Osler street to the junction of Liesemer street. The public works and police department re-routed all traffic during the oiling.

Band Concert Realizes \$12.75 for the Red Cross

The sum of \$12.75 was collected by the Boy Scouts for the Red Cross at the band concert given Saturday night in Didsbury by the Didsbury and Carstairs Band, under direction of Mr. Hans Olsen.

BIRTHS

Didsbury General Hospital.

June 29th, to Mr. and Mrs. Lester Stauffer, a son, Trevor Milton.

so that she had received to her appeal for an ambulance. This has already been supplied.

Music was furnished by Mrs. Richard of Calgary, Mrs. Pearson and Mrs. Edwards of Didsbury. Mr. Munroe presented Mrs. McGhee with a gift on behalf of the members of Carstairs Chapter as it was the eve of her birthday.

Ambulance Fund Sees Completion

Collecting for the Didsbury & District Red Cross Ambulance has been completed, and the mark reached far exceeds the original objective, which was \$2,070.00, the cost of the ambulance. Since Canada is supplying more ambulances than asked for, the cost has been reduced to \$1,750.00.

As \$958.88 has been oversubscribed, and several outstanding pledges have not yet been handed to the committee, these amounts will be used for Red Cross supplies.

Donations now stand as follows:

Refugee Children

Under arrangements between the British and Canadian Governments, children are being evacuated from Britain to Canada. These children will be placed in suitable Canadian homes. In the Province of Alberta, the department of Child Welfare is making the necessary preparations to receive and locate, in good homes, the children coming to this province.

Persons in Didsbury and district desirous of providing accommodation in their homes for refugee children, may obtain the required application form from W. A. Austin, Secretary of Didsbury and District Red Cross Society.

The maintenance, education and caring of refugee children is entirely a gratuitous service and forms part of the Nation's war effort.

M.B.C. Young People's Day

On July 10th, the M.B.C. Camp Meeting will hold a special attraction for young people. In the afternoon at 1:30 the Young People's Association of the M.B.C. Church will meet for its annual re-organization and will feature an interesting program in this connection.

The Association cordially invites all young people of other churches and of the communities near Didsbury to attend.

Rev. and Mrs. J. Carlson of Edmonton, singers, musicians, and speakers, will be with us and will bring messages to the large group expected. There will also be young people's meetings daily at 1:30 p.m. throughout the entire camp. Young people, reserve July 10th for camp meeting this year.

BURNSIDE NOTES

Lone Pine W.I. will meet Thursday, July 11th, with Edna Dowell, at the Fred home. Mrs. Sam Elliott will take the topic "Education and Better Schools". A kitchen apron contest will be held.

Mr. and Mrs. E. R. Dawson, of Sunnyslope, were Sunday visitors with Mrs. B. A. Woods and family and Mr. and Mrs. Wm. Lyons.

All roads lead to I.O.D.E. Bomber Dance at Melvin tomorrow (Friday) night.

TOTAL \$2,708.88

Just before going to press the sum of \$25 was received from Mr. and Mrs. Fred Budgeon, bringing the above total to \$2,733.88

Correction—Last week the M.B.C. Church donation was listed as \$25. This was an error, the correct figure being \$75.

Didsbury A.W.I. Constituency Conference

About 100 ladies gathered in the Zion Evangelical church on Tuesday, July 2nd, for the annual conference of the Didsbury constituency A.W.I.

Mrs. N. Eckel, retiring constituency convener, presided. Mrs. Wm Stewart, of Peace River, president of the Alberta Women's Institute, and Mrs. W. McFarlane of Red Deer, director of District No. 2, were the principal speakers.

Mrs. W. Stewart spoke on her work among the Institutes and gave a splendid address on "Freedom, Our Heritage," while Mrs. McFarlane's topic was "The Duties to, and privileges of, Our Organization."

The Evangelical Ladies Aid served a bounteous dinner to those in attendance.

Entertainment was provided by Mrs. Ketchen, Mrs. Ross Youngs, Miss S. Zook, Miss Enid Roberts, and little Misses Margaret Norris and Bowlen.

Election of officers resulted as follows:

Constituency Convener

Mrs. F. Himmelrich, Carstairs and following conveners of standing committees:

Child Welfare & Public Health

Mrs. Harvey Hosegood, Rugby

Handicrafts

Miss Helen Wahl, Rugby

Legislation

Mrs. B. A. StClair, Mt-View

Agriculture & Canadian Industries

Mrs. Alex Robertson, Westcott

Education & Better Schools

Mrs. B. A. Woods, Lone Pine

Canadianization & Immigration

Mrs. J. Devolin, Siebertville

Economic

Mrs. W. Fredelli, Siebertville

A hearty vote of thanks was accorded Mrs. N. Eckel, retiring constituency convener, for her work during a 5-year term, and to all those who made the conference a success.

A Valuable Contribution

Consolation is to be derived from the discovery that educational authorities in Western Canada are becoming concerned over the necessity for closer co-operation between the universities and the high schools of the country and of more co-ordination in the direction and effort of these two entities of the education system, if the purpose for which they stand is to be fully achieved.

It has been found that the needs of the student, who is supposed to be "prepared for life", while continuing and completing his or her formal education in either one or both of these educational institutions, have very materially changed during the past decade, principally due, of course, to changed conditions in the economic, commercial and even the cultural departments of life.

It is now realized by educational leaders and students and is beginning to seep into the public consciousness that both the high schools and the universities may fail in their missions unless some important changes are made in the curricula of both.

A really valuable contribution to this problem has recently been made in the report of a committee of the Executive of the Manitoba Educational Association, consisting of representatives of the university and the high schools and appointed to study the problem of articulation between the high schools of that province and the university. While the report, which is the result of sixteen months of study, deals primarily with conditions as they exist in the Province of Manitoba, the findings and recommendations are sufficiently broad to be of general application and interest throughout the west, and possibly throughout the entire Dominion. Indeed, educational organizations in the sister western provinces find the report of sufficient importance to warrant close study and consideration in the light of similar and parallel conditions in those provinces.

Changes Are Needed

To put the matter in a nutshell, the committee found that while the courses of study in the high schools were designed to make these institutions preparatory schools for university courses, comparatively few of the students reach the high institutions and that, because of this fact, the preponderantly large number who complete their formal education in high school are not being fitted to take their place in the business life of the community when they leave school.

The committee was given authoritative testimony to the general effect that continuance of the present trend will not only result in increasing numbers leaving high schools unprepared for entry into business life but that the university itself may presently find itself "out on a limb" for lack of sufficient students to enable it to continue to function.

If these premises are well based, and there appears to be every reason to believe that they are, the broadening of the basis of the high school curriculum is the obvious solution, and that is the conclusion to which the committee came. Not only that, but it was suggested that if the high schools are destined to become the "university of the common people", as one learned witness phrased it, the high school course should be extended another year, because, if the curriculum is to be broadened, there is not sufficient time in the existing high school span to devote to a completed formal educational system.

On the other hand it was felt that if the university is not to become atrophied and decimated entrance requirements will have to be materially liberalized to give an opportunity to a larger number of high school students to enter its doors with the objective of subsequent specialization.

Wider Objectives

To quote one section in a very voluminous report: "The course of instruction in the high school and also in the junior division of the university should cater to the needs of young people at the age levels represented in the enrolment in these institutions; that is to say, it should be related to the natural activities of mind and body at these age levels. It should not consist to any considerable extent in courses which are only of value if the subjects are carried further. It should be reasonably all-round, while giving full opportunity for the pursuit of individual interests; and it should stimulate or create desire to continue further study after formal school education has been completed. This," it was pointed out, "is in accordance with the recommendations contained in the report on secondary education by the British Board of Education, commonly known as the Spens report."

It is gratifying to note that while emphasis is given in the report to the necessity of fitting high school students for business life, the fact that this is not the entire objective of secondary education is not overlooked. The principal of Daniel McIntyre Collegiate Institute is quoted as expressing his belief that the schools should "be free to plan within the curriculum for such things as athletic activities of purposeful type, the Literary Society, music, art, handicrafts, mock parliaments, school periodicals, student councils, etc., etc."

Altogether the report is a worthwhile document and it is a reasonable assumption that much of its material will be given earnest consideration far beyond the confines of the Province of Manitoba.

Requires Little Effort

Oxygen tents are so helpful to pneumonia victims because fatigue is one of their most devastating enemies. So when a patient breathes air two or three times as rich in oxygen as ordinary air, it permits the patient to get his requisite oxygen supply with much less effort.

There are more than 100,000,000 head of sheep in Australia.

Derpo Bug Killer, 85c.

Exterminates bedbugs, moths, cockroaches, crickets, fleas, lice, ticks. At Eatons, Simpsons, local dealers or Derpo Products, Toronto.

In Greater Demand

Silver May Replace Gold As International Base After War

Silver will be in greater demand during the war and may become the metallic base for international currency after the conflict is over, Senator Key Pittman of Nevada told reporters.

"There isn't sufficient gold in the world to place the leading commercial countries on a gold base. Silver may provide the needed base or at least a percentage of it," he said.

Alaska's wettest spot is Little Port Walter, with 255.23 inches of rainfall in 1939.

Army Huts

Britain Uses Concrete And Sawdust As Economy Measure

Designed to meet the timber shortage and to economize in steel, the new army hut is a mixture of concrete and sawdust—and it is a success.

Made in precast sections of a mixture of concrete and specially treated sawdust, it can be screwed together and nails driven into it as easily as wood. It is also fireproof. Once the precast sections are made, the hut can be assembled in the course of a few hours.

This new type of hut contains only half a standard of timber against five standards in the old wooden hut, and only 54 pounds of steel wire as reinforcement. All the materials are home produced.

The inventor claims that 10,000 of these huts can be turned out a year with an immense saving of wood and timber.

SELECTED RECIPES

WHOLE WHEAT DATE AND NUT BREAD

- 1 cup white flour
- 1 teaspoon soda
- 4 teaspoons baking powder
- 2 teaspoons salt
- 2 cups whole wheat flour
- $\frac{1}{2}$ cup brown sugar
- $\frac{1}{2}$ cup Bee Hive Golden Corn Syrup
- $\frac{3}{4}$ cup milk
- $\frac{1}{4}$ cup water
- 1 egg, beaten
- $\frac{1}{2}$ cup broken walnuts
- 1 cup dates, chopped
- 2 tablespoons St. Lawrence

Double Refined Maize Oil.

Sift first four ingredients together. Add whole wheat flour and sugar, walnuts and dates, then the Bee Hive Golden Corn Syrup, milk, water, egg and St. Lawrence Maize Oil, and let stand 20 minutes in loaf pan rubbed with St. Lawrence Maize Oil. Bake in slow oven one to one and a half hours.

CELERY AND CARROT SALAD

- 1 package Orange Jell-O
 - 1 pint hot water
 - 2 teaspoons vinegar
 - $\frac{1}{4}$ teaspoon salt
 - $\frac{1}{2}$ cup mayonnaise
 - $\frac{1}{2}$ cup diced celery
 - 1 cup grated raw carrots
- Dissolve Jell-O in hot water. Add vinegar and $\frac{1}{4}$ teaspoon salt and chill until slightly thickened. Fold $\frac{1}{2}$ of Jell-O into mayonnaise; add celery and turn into individual molds or ring mold. Chill until firm. Season carrots with $\frac{1}{4}$ teaspoon salt. Fold into remaining slightly thickened Jell-O and pour over firm Jell-O in molds. Chill until firm. Unmold on crisp lettuce. Garnish with mayonnaise. Serves six.

Has Changed Size

At one time the earth was much smaller than it is at the present time, but it added to its original size by drawing into itself wandering nebulous materials. Later, shrinkage during the cooling process reduced it to its present size.

Founded A Newspaper

Correspondent Of Franco-Prussian War Of 1870 Comes To Western Canada

French and German troops were locked in terrific fighting the other day around the historic village of Montmedy.

Montmedy lies near the north-eastern French border and was the scene of a great battle in the Franco-Prussian war.

An incident in that other battle, 70 years ago was probably an important factor in the establishment of the Regina Leader.

A brilliant young Irish journalist, acting as war correspondent for a London newspaper, fell from his horse as he attempted to follow the progress of that battle. He was rather seriously injured and was advised to take a holiday to recuperate.

The correspondent was Nicholas Flood Davin. He made arrangements to come to Canada to do some special writing, became a newspaper man and political figure in Toronto and came West with first development of the Saskatchewan country. He founded the Leader a few months after the townsite was established and remained to become one of the most colorful figures in the history of Regina. — Regina Leader-Post.

Loan Over-Subscribed

In Australia a £20,000,000 war loan has been over-subscribed and "the lists were therefore closed a whole week earlier than was intended," the British Broadcasting Corporation announced.

The New Dawn rose, a freak of nature, was the first plant patented under the plant patent act. It was found growing among a group of Van Fleet roses.

New Atomic Gun

Electron Bullets Keep Returning To Weapon Until Target Reached

An atomic gun which never fails to put every bullet into the target has been perfected at Cornell University, Ithaca, N.Y.

The gun fires electrons as bullets. If these bullets miss the first time, they turn around and come back. This they keep up, back and forth, until every one of them has found its mark.

All this they do at speeds of about 12,000 miles a second. When, on missing, they return to the gun, they do not enter the muzzle, but just approach it, and then rush off as if fired again. The gun gives them their directions and furnishes the initial energy to enable them to keep up their see-saw.

Their targets are the atoms in gas, which are so hard to hit by electrons that ordinarily only one electron out of every thousand would make a hit. The others would be wasted.

The gas atoms at which the electron bullets are fired become positively charged ions whenever they are hit. The Cornell development represents the most efficient source of atomic projectiles yet produced.

Their practical uses are two. They are used to disintegrate the nuclei of atoms and to help in separating the heavy from the light atoms which form a given chemical element.

The electron bullets of the Cornell gun are induced to fly back to the muzzle by an ingenious combination of electric and magnetic fields.

After hitting the atoms and changing them into ions, the gun goes still further and herds all of the ions to the axis of the gun and fires them out of the end at the rate of billions a second.

One practical advantage of the new gun is its small size. The gun portion of the apparatus is less than an inch long.

The planet mercury completes a trip around the sun every 88 days, and thus has a year that is shorter than a spring or summer on our earth.

The Beneficial Effect Of Sunlight On Health More Generally Recognized

Hippocrates, the Father of Medicine, prescribed sun treatment in the 6th Century B.C.; and native tribes all attributed vigour to sunlight so that the health-giving value of sunlight was recognized long before the dawn of civilization. Dr. D. V. Currey, Medical Officer of Health, stated in his weekly health message. Continuing Dr. Currey stated:—

Most primitive races also knew of the healing qualities of the sun's rays, and exposed themselves and their wounds to the sun. Some even thought that all forms of ills or ailments could be treated by direct sunlight. Some of the ancients worshipped the sun, and it is related that athletes were required to take sunbaths which were also a daily custom with many of the warriors. But during the middle ages, as Christianity asserted itself, the knowledge of the value of sunlight seems to have been more or less lost.

When we think of the sun's rays the light is not as simple as it seems, because we have discovered that the sun's rays may be broken up into many different parts from which we get the seven primary colors: red, orange, yellow, green, blue, indigo and violet. We have found that each of these rays have different lengths, different penetrating power and different medicinal value. The red rays, which have much greater penetration power than the blue, are the principle source of heat; while the yellow rays have greater intensity of light; and the violet rays have been found to be of a chemical nature. Not long ago it was discovered that at each end of the spectrum there were other rays which we now call infra-red and ultra-violet rays. The infra-red are very hot and cause a rise in temperature in the human body, whereas the ultra-violet, although cold, have been shown to have a chemical re-action, and they are found in greater abundance in the sunlight high up in the mountains.

The intensity of sunlight changes considerably in its passage through the atmosphere, in which some of rays are more or less lost; so that not all sunlight has the same health-promoting or disease-resisting value, as the more the atmosphere is permeated with dirt, dust or smoke, or the more it is saturated with water vapour, the greater is the loss of health giving rays. Fog, cloudy, or smoky atmosphere act as a screen barring the passage of ultra-violet rays which are so necessary to health and are particularly essential in sunlight treatment. It has also been found that these rays will not penetrate through ordinary window glass or clothing, and even some forms of cosmetics keep them out. In the winter months there is a further reduction in the ultra-violet rays that reach the earth from the sun.

The conditions under which we get sunlight are very important in regard to our health. You may sit in a room flooded with sunlight, but you will not likely get ultra-violet rays unless you are sitting in the direct sunlight without a window in between. In the last decade great strides have been made in the appreciation of sunlight in regard to health and in its utility for making people feel well. It is only within the past

few years that abbreviated bathing suits on the beaches and shorts for men and women have come into use, permitting the body a liberal application of sunlight. There is no doubt that in the future, women because of their lighter and more abbreviated apparel, will be healthier than they have been in the past. Men are much more conservative and still over-clothe themselves; perhaps this condition will be changed so that men, too, may get some health value by using less body covering.

Sunlight seems to be now receiving attention, and certain institutions are in operation in many parts of the world where the climatic conditions are favourable. The Alps seem to be especially favoured and heliotherapy, or sunlight treatment, appears very popular, especially in mountainous places above the clouds.

An old proverb says "When the sunlight does not enter, the physician does." There is no doubt that this proverb is right, as sunlight will improve the vitality of the body, build up resistance to disease and relieve pain. Lately it has been found that among other things, it raises the calcium and iron in the blood and stimulates the metabolic process.

Proper sunlight is necessary for acquiring and retaining beauty and a healthy skin; but over-exposure may result in trouble. Modern athletes recognize that a well-tanned skin helps to resist bruises, and infection; so those taking part in active athletic training usually do so in the open air. People who have a good tan seem to possess greater resistance to infection than pale people. There may or may not be some special virtue in the tanning process itself, but usually a tanned person is a healthy one, and it has been found that individuals who do not tan well, do not recover from serious illness as well as those who tan easily.

In our modern treatment of tuberculosis, sunlight plays a very important part. We stress for these patients sunlight, fresh air, good food, and rest as the four things necessary for recovery from this disease, and sunlight seems to be a real health agent. Certain places where there is a great deal of sunlight, such as along the Mediterranean, and in Southern climates people do not seem to be subject to tuberculosis to the extent that the northern races are.

Some diseases seem entirely due to civilization and clothing. Rickets is unknown in certain parts of the world where there is a great deal of sunlight, and it has been proved to be a disease due to sunlight starvation. In our climate from November to May when the sun is at its lowest ebb, few of the health rays reach us, so that during this time we must use some artificial form of sunlight, such as cod liver oil.

All babies should have sunlight treatment, but as the skin is tender, only a small part should be exposed to start with for a few minutes but each day more of the body may be exposed and for a longer time. Children exposed to the sun rays are healthier and happier than those who do not get this treatment; these children are much less likely to get infections than are others.—St. Catharines Standard.

British Air Dispatch

Pilots Carry Anything In All Weathers At Any Time

Pilots of the British Air Dispatch are real dispatch riders of the sky. The organization was taken over by the Air Ministry at the outbreak of war. Its pilots are young and tough and carry anything from urgent messages to high explosives in all weathers and at any time of day or night, states the London Daily Sketch. Young Radio Officer J. Pullman is typical of these anytime-anywhere boys. He learned to fly in the Canadian Air Force.

The sun weighs about 700 times the total weight of the earth and all the other planets combined.

More than a million persons die of malaria in India each year.

Grandfather Clocks

South Africa Discards German Clocks For British Made

The modern English grandfather clock is in great demand in South Africa. Ever since the beginning of the war, British clocks have been displacing the German in South African homes.

At the time of the South African War American clocks held the union market, and they are still popular at the present time.

Germany then developed the industry, and they were imported on a large scale.

Now it is the turn of the "English grandfather." They are the most popular clocks used by the union.

A newspaper speaks of the "dangerous automobile." Is there any other kind? 2364

Strange Implements

British Steel Factories Manufacture Matchets For Use In Tropical Countries

A curious type of agricultural "armament" that has never been seen on an English farm has been made in a British steel factory for well over 100 years.

The implements are matchets. Used for harvesting, pruning and land clearing in tropical and sub-tropical lands, they have a war-like ancestry which provides one of the romances of the tool trade.

Some matchets are broad and flat, some narrow with curved tips, others shaped exactly like swords. Some of the blades have "blood lines" or thin furrows, running down them. These lines are relics of the matchet's origin as cutlasses wielded by piratical boarding parties, and even today they are sometimes used for settling disputes.

Workers are very conservative about design. They will not tolerate the slightest change from the type they habitually use, and each country has its own peculiarities. The British factory makes only one "blood line" on the matchets it sends to Venezuela, but the Jamaican insists on having three lines, while the Trinidad workers will not have any lines. Handles vary from beech-wood and leather to fibre and Indian buffalo horn, and brass wire bindings are essential when selling to Brazilians, Venezuelans, Colombians, Ecuadorians and Peruvians.

Africa, Malaya, Papua, Sarawak, New Guinea, Fiji and Samoa are also big buyers of matchets from Britain, whose chief rival before the war was Germany. The two countries between them shared almost equally 75 per cent. of the world market, although there were only two British factories making them. These two firms are busier than ever now that the Allied blockade prevents Germany's seaborne trade.

War Strategy

Patience And Endurance Will Ultimately Lead To Victory

Now that Canadians have awakened to the realities, they ought to understand that the strategy of the Allied powers is to foil the efforts of the Nazis to effect a sudden decision by total violent war, and thereafter by slow accretions of strength, by courage, patience and endurance to so change the balance that victory will be ultimately attained.

It will be a hard and probably a long road. Our men in the field, on the sea and in the air have these qualities and have set their feet upon this road. But they can only follow it resolutely to the end if the home-front matches them in coolness, steadiness, patience a most essential quality—and courage.

The home-front is made up of individuals, every one of whom, as we have said, is in the war; and its strength and endurance will be the sum of these individual qualities. Winnipeg Free Press.

power, according to estimates of steam engineers.

Royal Military College At Kingston Now Geared For Important War Role

According To Experts

Europe Is Facing Greatest Food Shortage In Its History

Europe faces one of the worst famines in history next winter, according to U.S. Department of Agriculture experts.

A report being compiled by the Foreign Service Division of the Bureau of Agricultural Economics discloses that wheat and other cereal crops are failing. The exact reduction has not yet been determined, but every European country is affected.

A spokesman for the division said that Europe has never, in recent years, been able to feed herself and that the food shortage this year will be worse than ever before.

A severe winter and an exceptionally late spring have held up spring planting, the division's experts have found. Even in Russia, comparatively unaffected by the war, planting is estimated at ten per cent. behind normal.

In many countries, particularly Germany, there has been a loss of acreage because of insufficient farm labor. Men who normally plow the fields have been sucked into the war machine.

In the Netherlands, the opening of the dikes wiped out much arable soil. In Poland, the land was ruined by the Nazi invasion and, in addition, many peasants were drafted by the German authorities for the Nazi war machine.

A large part of northern France and Belgium has been devastated. In the Danube basin, floods ripped open the soil, and the crops there may be the smallest in recent years.

The largest loss of acreage was due not to the war's devastation, but to the extreme cold of last winter, it was said.

New Style Tank

Equipped With Armored Power-Controlled Gun Turret

A new 14-ton tank with armored power-controlled gun turret is under production by Great Britain, it was disclosed.

In demonstrations the tank, a four-man cruiser type, has been able to travel 30 miles an hour on the flat and 15 to 20 miles an hour over rough country.

The tank was said to be highly manoeuvrable with swift acceleration. The turret, with gun and wireless, weighs 2½ tons, and can be swung completely around in five seconds.

Originally, pies were made in old England as a means of serving meat, and not as a dessert. The fruit pie originated in America.

The United States is the world's largest consumer of sugar.

The Royal Military College of Canada, geared now for the important wartime role it must play in providing efficient officers for the services, has been stripped of some of its traditional color but the dominant tradition of service takes on a more positive meaning.

When the cadets enrolled step into their posts of duty in the armed forces the bright uniforms of peacetime will disappear from the campus. In peacetime many of the young men passed out of the college into civilian life, but now, with the nation at war, all will go into armed forces.

The graduates all are expected to accept commissions in the navy or the army or enter the air force if opportunity is available, and if not to accept combatant commissions in the Royal Canadian Naval Volunteer Reserve of the non-permanent active militia.

A gentleman cadet of the R.M.C. was a marked man in peacetime. The trim blue uniform with the bright red tunic for walking out, and ceremonial cape and the small round "pillbox" formed a distinctive garb. When the next class enters the college in September, however, they will don khaki and will be dressed as army officers without rank badges.

Coupled with the disappearance of the colorful uniform, the R.M.C. has taken to wheels, in common with the artillery and much of the cavalry of the Canadian army.

The college's once-prized riding school has been converted into a workshop and mechanical transport school. Instead of learning to ride horses the cadets learn to repair and service cars and trucks.

Corridors are lined with pictures of former cadets who died in the first Great War and the walls bear the names of hundreds who served in that conflict, won decorations or served the Empire in other spheres.

In the first Great War more than 95 per cent. of all the graduates who were fit for service were under arms, and 15 per cent. were killed. In all, they obtained more than 600 decorations and mentions in despatches.

Of two classes graduated last fall when the wartime system of a two-year instead of a four-year course was inaugurated, every one was commissioned in the navy, the army or the air force, 100 in all.

In Air Force

Lord Beaverbrook, Minister Of Aircraft Production, Has Son Who Is Aviator

Lord Beaverbrook, whose job as minister of aircraft production is to make warplanes, told an interviewer that his son "Max" is his only direct contact with the flying of them.

"Max" is Hon. John William Maxwell Aitken, 30-year-old squadron leader in the Royal Air Force.

"I call him every morning before he goes out to fight and he calls me every evening after he has returned from risking death and dealing it, which is our way of life in these days," Lord Beaverbrook said.

"Like all others, he thinks his own fighter is the best plane there is. That is the curious thing of this war. You'd expect criticism of the equipment they are given but it is just the contrary."

Cannot Be Compared

War Costing Canada Three Times As Much As Last One

Judged by the rate of present expenditures, war costs to-day are more than three times as heavy as they were in the last war. In the first six months of the last war, Canada spent about \$50,000,000. The first six months of this war, Canada spent \$115,000,000. Between August 4, 1914 and March 31, 1916, the Dominion expended \$230,000,000, whereas in the fiscal year, March 31, 1940, to 1941, the estimated expenditure amounts to \$500,000,000, and in addition, \$100,000,000 for the air training plan. Thus the comparison in costs between the two wars is as between \$230,000,000 and \$715,000,000.—Toronto Star

Handy Sweater Knits up Easily

PATTERN 6614

A sleeveless sweater is an all-year necessity in every man's wardrobe. He'll specially prize this practical hand-knit in Cashmere sport yarn, done in easy ribbing. There are matching socks. Pattern 6614 contains instructions for making sweater in small, medium and large size; socks in any size desired; illustrations of them and stitches; materials needed.

To obtain this pattern send 20 cents in coins (stamps cannot be accepted) to Household Arts Department, Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

PREVAILS**

ONCE MORE in the annals
of the history of Didsbury
does co-operation play a
great part in bringing about worthy
projects, utmost in the minds of the
citizens of our fair town and district.

Just a few weeks ago the citizens
of this community were advised of
the fact that plans were to proceed
for the raising of funds to purchase
an ambulance. Perhaps in the
minds of some "doubt" prevailed,
but to the stalwarts success was out-
standing. The committee has made
arrangements for the ambulance to
bear a plaque, bringing "Didsbury
& District" to the fore.

The time set for the collecting of
funds to purchase Didsbury's am-
bulance has expired and the amount
collected far exceeds the original
cost of the ambulance, which was
\$2,070.00. The amount subscribed
is \$2,708.88. Since Canada is sup-
plying more ambulances than were
at first expected the cost has been
reduced to \$1,750.00, which is a
fine reduction and the amount now
showing over and above this is
\$958.88, which will be used for the
purchase of further Red Cross sup-
plies.

Hence the word "Patriotism"
prevails and great credit is due the
committees in charge and the donors,
whose assistance and good spirit is
worthy of merit, and if remunera-
tion is not perhaps realized in this
sphere of life, the future holds more.

We are living in a peace-loving
country, with a peace-loving people
and ultimate peace shall be our
portion.

Let us, as citizens of this fair com-
munity continue to thrive on the
thought of future peace with victory,
though drastic days ahead are vi-
sualized. The ultimate end will be
"Peace and Victory."

Items of Interest

Opening of the Jasper-Banff high-
way, while not an official event as
at first planned, nevertheless attrac-
ted many prominent newsmen and
publicists from across the line. Sat-
urday last W. D. King, deputy
minister of Trade and Industry,
greeted a group of 20 from Wash-
ington, D.C., Detroit, Chicago, Spo-
kane and other points. They left
Calgary for the mountain trip. At
Icefields chalet the Banff and Jasper
boards of trade entertained travel
and publicity heads in a similar
mission.

Recruiting for the composite
South Alberta regiment continues
at a brisk pace throughout the pro-
vince, and a recent batch of men
sent down from the Peace river won
much praise on their arrival at Ed-
monton. Including farmers, trap-
pers and rivermen, the Peace boys
have proved welcome additions to
what promises to become another

The World of Wheat

The Canadian Seed Growers As-
sociation has just held its thirty-
sixth annual convention. Seed
grower delegates, representing the
3,000 members, came from every
province in Canada, and for three
days discussed ways and means of
making quantities of high quality
true-to-variety seeds available to the
farmers at reasonable prices, so that
Canadian field crops could be im-
proved.

The beginnings of the Association
date from 1899, and sprang from
the vision of the late Dr. James W.
Robertson, then Dominion Commis-
sioner of Agriculture, a great man
if ever there was one. In later years
looking back on the work that had
been done by seed growers, Dr. Ro-
bertson remarked:

"Many thousands more men
now recognize that seed does not
merely mean grain but the seed
means a contained life. It means
the quality and power of the con-
tained life, which gives the
plant, rising from the seed, com-
mensurate power to overcome
obstacles, garnering from air,
sun and soil, strength and beau-
ty and wealth for us. This is
seed grain, grain with the capaci-
ty to perform that function for
us. The man who has studied
seed, and has obtained an in-
sight into the meanings of life,
will behave in all relationship
in a wiser and nobler way."

Following factors have tended to
raise price: A serious food shortage
is reported in Belgium -- Wheat
seedling in the Argentine is being
retarded by excessive rains -- Exten-
sive grasshopper damage in south-
west Saskatchewan -- Searle Grain
moisture report No. 10 shows a de-
cline of 2 per cent for week ending
June 26th.

Following factors have tended to
lower price: Harvesting has com-
menced in parts of U.S. winter
wheat belt -- Spring grains in the
Balkans are now making satisfactory
progress -- Harvesting of wheat in
Italy has begun -- A harvest of 4 1/2
billion bushels of all grains (wheat,
oats, barley, corn and rye) is esti-
mated in the U.S.A. for 1940.

crack Alberta fighting force. Herman
Trelle, world's wheat king, is also a
soldier again -- but he is with the
Engineers in Calgary. He thus
takes up the profession he learned
in his youth, when he was graduated
as an engineer from the U. of A.,
then obtained a commission in the
Air Force before going to the farm
to show the world that Canada is
the greatest wheat growing country.

Organization of the staff for Ed-
monton's air observers' training
school is being carried out by W. R.
"Wop" May, superintendent of
Canadian Airways. A new formed
subsidiary, Canadian Airways
(Training) Ltd., will manage the
new school under Mr. May's direc-
tion. The famed northern and
Great War flier will have control
over all buildings, equipment and
personnel except the R.C.A.F. in-
structors. Mr. May has issued an
urgent call for more engineers and
assistants to complete the mechan-
ical personnel. Anyone who feels
he can qualify should communicate
with him immediately at the C.A.L.
office, Edmonton.

Referring to the recent Canadian
budget, Wallace Campbell, president
of the Ford Motor Company of Can-
ada, believes the new tax on car
sales will prohibit the purchase
of higher price cars not built in
Canada. His company will make
any necessary adjustments. "We
are in accord with the expressed
policy of the government to finance war
costs on a pay as you go basis," said
Mr. Campbell.

"Be a good host to a good neigh-
bour," is the advice of the finance
minister Ralston for encouraging
the tourist business. In his budget
speech the minister warned against
"unfounded rumours that have been
circulated." By stamping these out
and encouraging our American
friends to visit us, Col. Ralston de-
clared that "nearly every Canadian
can help to increase our receipts of
foreign exchange." No passports
will be required from United States
citizens visiting Canada.

Odd Accidents.

Charles Brunker, a taxi driver in
Kansas City, Kan., had to jam on
his brakes to avoid hitting a young-
ster who ran in front of his cab.
"Your folks ought to tan you good
for playing in the street," he shout-
ed at the boy. His passenger, a
mild-mannered lady leaned forward,
"You're absolutely right young man,
she exclaimed. I'm his grandmother.
I've spanked him before and I'm
going to do it again."

Frank Miska was in a hurry to
cross the street in Temple, Texas.
As he stepped off the curb a car
whizzed by and ripped off, of all
things, his pants. There stood Mr.
Miska on the busy downtown corner
in longhanded underwear and con-
siderable embarrassment. The driver
soothed the Miskan pride by provid-
ing new pants to replace the hitch-
hiking pair.

Burnside Notes

Mr. and Mrs. Chris Hansen and
Mr. and Mrs. Wm. Hansen and son
Robert of Bellingham, Wash., have
arrived for a two week visit with
their daughters, Mrs. C. E. Tidball
of Carstairs, and Mrs. Edna Dowell
and family at the Fred Metz home.

George Miller left last week to
join the Tank Division in Calgary.

Mrs. N. Eckel spent a couple of
days in Calgary last week.

Mrs. Edna Dowell and children
Ray and Evelyn spent Saturday in
Carstairs.

Mr. and Mrs. George Topley and
Mr. and Mrs. Wallace Elliot of
Morden, Manitoba, were recent
visitors with their brother, Mr. John
Topley and Mrs. Topley.

Mrs. Art Somers and Mrs. Jensen
of Calgary were recent visitors with
their brother, Mr. Otto Bittner and
other relatives here

Mr. and Mrs. John Topley spent
Friday in Calgary.

Miss Julia Ridley and Mr. Alex
Middleton of Calgary, spent Domi-
nion Day with the former's sister,
Mrs. Kate Saunders and Mr. and
Mrs. Wm. Saunders

Mr. and Mrs. Benner of Calgary
are visiting their daughter here, Mrs.
Peter Schumaker.

Westcott Notes.

The June meeting of St. Paul's
(Lutheran) Ladies' Aid was held at
the home of Mrs. Otto Folkmann,
with a good attendance. The de-
votional was conducted by Pastor
Reiner. Arrangements were made
for the annual picnic, which will be
held on Friday, July 5th. A han-
dicraft contest will be conducted at
the August meeting, which will take
place at the home of Mrs. E. Art-
man

Miss Joyce Levagood, of Calgary,
returned home Saturday to spend
the vacation with her parents, Mr.
and Mrs. Harry Levagood.

We are pleased to report that
Dale Jacobsen, who had been in the
Red Deer hospital, is improving
from an injured arm

Garfield Girls' softball team have
entered the Provincial girls' play-
offs. Local girls on the team in-
clude June Jacobsen (captain),
Marion Levagood and others

NOTICE TO CREDITORS AND CLAIMANTS

In the Matter of the Estate of FRANCIS
PERCY SAUNDERS, late of Didsbury,
in the Province of Alberta, Farmer, de-
ceased.

Notice is hereby given that all persons
having claims against the estate of the
above-named Francis Percy Saunders,
who died on the 19th day of March, A.D.
1940, are required to file with the un-
signed, Solicitor for the executors of his
estate, on or before the 8th day of August,
1940, a full statement, duly verified, of
their claims and of any security held by
them, and that after that date the said
Executors will distribute the assets of the
deceased among the parties entitled there-
to, having regard only to the claims of
which notice has been so filed, or which
have been brought to their knowledge.

Dated this 18th day of June, A.D. 1940.
W. A. AUSTIN,
Didsbury, Alberta.

Solicitor for Francis Wm. Doyle and
Matthew John Doyle,
Executors of the will of
Francis Percy Saunders, deceased.

Bergen Notes.

Some of the gardens have had
frost in the last few days

Gladys Admussen who was work-
ing near Caroline is clerking in the
Mjolsness' store.

Trygve Haug and Edwin Clarke
have bought a new truck. Dodge,
brethren, or you may get run over.

Some of the Bergen people are
planning to attend the Three Hills
camp meeting the last of June.

George Lutkehaus and Benlah
Baughman of Bergen were married
in Olds on June 17

The Highland soft ball team went
to Didsbury Tuesday evening to
play the Counter Hoppers. A fairly
close game resulted

Grandpa Davidson has gone to
Sundre to live with his son, Walter.
William of Westcott may move to
the home place.

The government clinic came to
Bergen on June 17-18-19. There
were 12 schools supposed to have
entered.

WORLD HAPPENINGS BRIEFLY TOLD

The United States agriculture department forecast a winter wheat crop of 488,858,000 bushels.

All enemy aliens employed by the city of Windsor were suspended at an emergency city council meeting.

Australian revenue for the fiscal year ended May 31 was the highest in the history of the commonwealth.

Four crates of supplies from what is believed to be the farthest north branch of the Red Cross Society in Canada were received from Yellowknife, N.W.T., 675 air miles north of Edmonton.

The Englishman's breakfast slice of bacon was cut in half—the official ration is now four ounces a week for each person instead of the eight ounces obtainable since the end of January.

Hon. John Hart, minister of finance, disclosed the provincial government is taking steps to ensure large supplies of British Columbia spruce being made available to Allied plane manufacturers.

Military conscription of the British population of the Straits Settlements has been voted by the council, the Exchange Telegraph Agency reported in a despatch from Singapore.

The British ministry of supply under an order issued brought some 15,000 firms under government control and subject to directions issued by government departments under the new conscription of property act.

Total building construction contracts awarded by the defence purchasing board and successor purchasing bodies now number 275, and amount to almost \$18,000,000, the department of munitions and supply announced.

HOME SERVICE

MELT OFF EXTRA POUNDS BY COUNTING CALORIES

Enjoy Healthful Tasty Diet

"Will there be MUCH alteration?" quavers Mrs. Buxom, trying on a new dress.

Come, come, Mrs. Buxom! You could fit perfectly into a size 36 and save money, too, if you'd alter your figure instead of your clothes. On a delicious low-calorie reducing diet you could easily lose two pounds a week, be slender.

Your bulges come from all the excess calories you consume. You think nothing of combining creamed tuna fish (391 calories) and chocolate pudding (400). Nearly 800 calories in one lunch!

To lose, keep your whole day's consumption down to 1200 calories for a while. For lunch take slimming tomato aspic (only 94); gingerbread and whipped cream (135).

With a calorie chart, it's simple to plan meals. And you soon learn to beware of dangerous extras like poultry stuffing (312 calories, 1/2 cup), mayonnaise (398, 1/4 cup), chopped walnuts (150, 1/4 cup).

Be youthfully slim again! Our 32-page booklet gives reducing menus for two weeks. Describes three-day liquid diet to start your reducing; has calorie chart, tasty recipes for low-calorie desserts.

Send 15c in coins for your copy of "The New Way to a Youthful Figure" to Home Service Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg, Man.

The following booklets are also available at 15c each:

183—"Self-Instruction in Short-hand"

78—"Decorative and Useful Objects Everyone Can Make"

"AA"—"Four Designs for Paintings on Glass"

167—"Popular Cowboy Songs"

116—"How to Choose and Care for Your Dog"

121—"How to Improve Your Vocabulary"

Would Appreciate Service

Real Need Of Modern Hotel Is Accommodation For Cars

Hotel men from 40 states met recently in Chicago to look into the future and prepare for the expected boom in American vacation travel which will result from a foreshortened travel frontier growing out of troubled conditions abroad. And looking into the future for business they found good cause to look back into the past, when inn keepers not only provided accommodations for the traveller, but for his beast as well. For the situation now in the automobile age is more or less analogous to the days of overland travel when if mine host accepted the traveller and board he needed also to accept the wayfarer's agency of transport.

So modern hotel men are convincing themselves that if the service ideas of old-time inns are to be met, wherein all the needs of travellers are to be anticipated and served, the automobile and its overnight housing cannot be ignored. No traveller of old cared for his animal to be tied at the curb overnight, nor did he expect to patronize a distant stable for oats and stall for his animal. He expected and got combined accommodations, and modern inn keepers are surveying the probability that the traveller who moves about on wheels will appreciate similar companionship of service, closely combined. —Brandon Sun.

A Convenient Place

Britain Will Intern Alien Women On Isle Of Man

The Isle of Man, chosen by British officials as a safe and convenient place for internment several thousand German and Austrian women, lies exactly midway between England and Ireland, 31 miles from each, in the Irish Sea.

Having won home rule from England nearly a century ago, the island has enjoyed peace with its fishing, farming and profitable tourist trade. Its tailless Manx cats have been its most famous products.

Earlier, however, the island was a scene of wild Viking invasions, shifts of ownership from Norway to Scotland to England, revolts, and unsavory smuggling ventures in the coves of its ragged coast.

The alien women will find themselves interned on an island of some 60,000 men and women. Despite its name, the Isle of Man was not so called to honor its menfolk, but was named in ancient British speech, Mona, meaning a "distant isle".

SPORTS STYLE BUTTONS AT BACK

By Anne Adams

There's a fresh, clean-cut, American-girl spirit about Pattern 4463! It's an Anne Adams dress, which explains its unusual verve and originality. That button-up-the-back idea is ingeniously young combined with the bow of the sash which comes from the front panel or winds all around. There are shoulder-to-shoulder yokes at both front and back, made on a striking crossgrain. You might have the yokes and sleeves in sprightly contrast. Notice the smart front panel and the new touch of buttons that march down either side to below the waist. Omit the sleeves and you'll have a real sportster!

Pattern 4463 is available in misses' and women's sizes 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38 and 40. Size 16 takes 3 1/2 yards 35 inch fabric.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly: Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Many German tanks are back to their original form—scrap iron.

I Read --- And Write --- For You

By JOHN C. KIRKWOOD

If you were in a spelling match, and were asked to spell this word, "4-n-propyleclohexanol-1," you'd probably ask the giver out of words to re-pronounce it—this several times before you began to trip over the spelling. This word is the name of a chemical substance derived from the liquefying of wood for science is now able to turn wood into water—not, however, H₂O. This liquefying of wood has been accomplished by Professor Harold Hibbert of McGill University.

Talk about astronomical figures! Astrophysicists have calculated that the sun has been radiating its life-giving heat or energy for 5,000,000,000 years! This may be the same as saying that the universe is five billion years old. And these same wisemen say that the sun burns up about 4,000,000 tons of its mass a second! It burns, but is not consumed. Or, to put it another way, in the language of these same astronomers, the carbon in the sun is forever being devoured in flames of hydrogen, yet reappears itself in its full original state every 52,550,000 years. This whole wonderful matter is one that is not likely to make any of us contentious.

Here's an idea, namely: the 1929 slump or crash was due to our changing appetite. This view is urged by Frederick Strauss, spokesman for the National Bureau of Economic Research of the United States. Mr. Strauss argues that the agricultural depression of the 1920's in the United States was an immediate cause of the industrial depression of 1929. The decline in the consumption of wheat and the replacement of wheat with other products—dairy products, eggs, tobacco, chickens, and staple foodstuffs other than wheat—had a very disturbing effect on the economy of agriculture; the shift from a coarse bulk diet to a varied quality diet was too abrupt, Mr. Strauss contends.

Our millers tell us that the consumption of bread in Canada has greatly declined from former levels, and our farmers know that the public's consumption of beef and pork is nothing very much to depend upon. So, you see, it is what we eat that gives prosperity to, or takes prosperity from, our basic industry—agriculture, and that when agriculture suffers, industry suffers.

Adults are beginning to do juvenile things such as playing with scooters. You are not likely to see them skipping and scooting on your street, but if you go to Jones Beach's Fun Fair on Long Island near New York City, you will see many grown-ups including grandmothers playing with see-saws, skipping ropes, wheelbarrows, pogo sticks, scooters, wagons and such like things, after the manner of youngsters. Perhaps some day not far off the elders in Canada will be doing what they are doing to-day at Jones Beach.

In Great Britain millionaires are on the increase, according to evidence provided by the Inland Revenue Commission. For the year ended March 31, 1939, the number of persons whose incomes exceeded £30,000 annually was 1,024, or 107 more than the preceding year. Persons whose incomes exceed £2,000 number 192,022, and increase of 3,290. Those liable for income tax in 1928-39 totalled 3,900,000, an increase of 200,000. Those exempted totalled 6,200,000—an increase of 200,000.

Who invented glass? The answer is, Nature. Nature's way of making glass is—and was from the beginning—a pouring lava from the world's volcanoes. Known as obsidian, this lava glass has some of the translucent properties of man-made glass. It was this Nature-made glass that was a challenge to the original glass-makers of some 4,000 years ago.

A Far-Seeing Man

Mohandas Gandhi Knows India's Best Friend Is Great Britain

Mohandas K. Gandhi has only to crook his little finger and the masses of India will obey his will. He may not be the official head of the Congress Party to-day, but he is in the position of the Scottish minister of whom it was said that wherever he sat was the head of the table. Gandhi has the people of his country in the hollow of his hand. If he ordered them to fight or to engage in passive resistance, or if he tells them to have patience they will obey.

Writing in his own paper, Mr. Gandhi said the British stand in no need of sympathy from a subject people for they already have that. The British, he declared, are a brave, proud people and they will not be demoralized by half a dozen setbacks like Norway. "We Indians," he added, "should make a timely, human gesture when Britain is up against a barbarous aggressor. The greatest gesture of the Congress is that it refrains from creating trouble in India."

Like a lot of big talkers Gandhi is a realist. He knows that the worst disservice his people could do to India now is to take advantage of Britain's desperate occupation with the war to stir up trouble and coerce the British Government into granting them complete self-government. To embroil Britain in another Indian mutiny on a national scale would almost certainly cause Britain to lose the war. And if Britain lost the war and lost India—which she governs wisely for the good of the Indian races—it would simply mean that instead of India gaining her independence from Britain she would lose it to Nazi Germany. India's new state would be a thousands times worse than at present.

Gandhi is a wise and far-seeing man. He knows who India's friend is, and as long as this war lasts there is no danger that he will allow his fellow countrymen to make an irreparable and grievous mistake. —St. Thomas Times-Journal.

Plague In Our Homes

Health Authorities Everywhere Warn Against Menace Of House Fly

With the approach of warmer weather, communities are again faced with one of the greatest menaces of mankind, the common house fly.

Doctors and writers in medical journals have pointed out, repeatedly and emphatically, the serious consequences of neglect in stamping out this plague in our homes. Consider, for instance, that scientific tests have shown that the bacteria on the hairy body of a single fly may number as many as five million, and a single buzzing fly can thus infect a whole household. Yet, in spite of these warnings, many people far too often accept the fly's existence and tolerate its presence as an inevitable evil associated with sunny days and warm weather.

Every year, unfortunately, we pay dearly for this indifference with outbreaks of infectious diseases. The summer dysentery of babies and other maladies can often be traced to these germ carriers, born and nurtured in filth which they eventually regurgitate on our food.

Several methods to control fly breeding have been advocated by health authorities but it is practically impossible to completely eliminate this condition. However, it is possible by killing any flies that do get into our homes to prevent them from transmitting filth and countless germs to our dinner tables, our babies' feeding bottles, and drinks and food left uncovered.

One of the most convenient and effective methods of controlling flies in the home is to place a few Wilson's Fly Pads at strategic locations throughout the house. They work quickly, cleanly, and kill all the flies. By doing this all during the summer, we contribute in a large measure to the elimination of the fly menace in our homes and eating places, thus making our community safer and cleaner.

Between the years 1870 and 1875 about two and a half million buffaloes were killed annually.

Bees will fly eight miles from the hive in search of food. 2364

Health LEAGUE of CANADA
presents
TOPICS of VITAL INTEREST
by **DR. J. W. S. McCULLOUGH**

HAY FEVER

Hay fever can be cured. The larger number of cases are caused by pollen from windborne pollinated plants, including certain grasses, weeds, especially ragweed, and trees. Flowering plants such as the rose, dandelion and goldenrod cannot be blamed. Certain foods, powders, animal dandruffs and feathers may act as causes.

But everyone does not contract hay fever. It occurs in persons with an inherited sensitivity to one or other of the causes. Over 80 per cent. of persons who suffer from hay fever or asthma have inherited a sensitivity to the various agents.

Chief causes:

(1) Grasses such as timothy, red top, blue grass and others.

(2) Trees such as the cottonwood, oak of many species.

(3) Weeds, of which the chief offender is ragweed. It is said that 70 per cent. of all hay fever victims in America owe their trouble to common ragweed and related species.

Hay Fever seasons: Grasses and trees as a rule, cause attacks in the Spring and early Summer, whereas weeds are the cause of late summer and early Fall attacks.

In Canada, the common ragweed, the chief offender, is found at its worst in the southwestern peninsula of Ontario, and almost equally so in the rest of settled Ontario and Southern Quebec. Through all the sparsely settled North, from Gaspe to Rainy River and even on the prairie, the ragweed found is usually the related perennial ragweed of the West or the great ragweed both of which occur rather sparingly eastward. Relief depends on:

(1) Getting beyond the bounds of the plant to which the individual is sensitive, or

(2) Having determined what pollen is responsible, submitting to desensitization with the appropriate pollen extracts for protection.

Change of Climate: Sensitive persons should get away in the hay fever season to resorts on the north shore of the St. Lawrence, on the Gaspe coast or nearby Lake Superior or Rainy River. Comfortable places to stall will be found in either area.

Desensitization treatment: A series of small scratches is made on the surface of the skin without piercing the true skin. On these scratches extracts of pollen, animal, dandruff, food or dusts, etc., are placed. If a hive or reddened area is produced by one or more of the extracts used, it is an indication that the individual is sensitive to that particular product. Having discovered the cause or causes, the next step is to desensitize by injecting a small quantity of the offending agent or agents.

Treatment should be begun two months before the season when the attack usually occurs. If the attacks are due to pollen, it will be necessary to continue the desensitization for three or four years. Most of the sufferers will say that, having gained a cure, it has been worth while.

Editorial Note: Readers who would like a valuable set of articles on the Cause and Control of Cancer may obtain them—free of all charge—by writing to: The Health League of Canada, Dept. W.N.C., 111 Avenue Road, Toronto, Ont. Just say: "Please send me Dr. McCullough's articles on Cancer", and print your name and address plainly.

How A Snake Walks

When crawling slowly, a snake may progress in a straight line by bringing forward the broad plates of the abdomen and then pulling them back again. It actually "walks" upon these plates. When frightened, it travels swiftly along in a series of lateral undulations.

A bird's tail acts as a rudder in flight, as a brake in alighting, and as a balancer when perching.

In the Himalayan range there are 20,000-foot peaks as yet unnamed.

There's DOUBLE ENJOYMENT in delicious DOUBLEMINT GUM

The Park Lane Mystery

By Edgar Wallace

Copyright, by Edgar Wallace. Serialized by Ledger Syndicate.

CHAPTER VII.

Ingle was a man of wide political activities. No party man in the sense that he found a party to match his own views; rather, he was one of those violent and compelling thinkers who are unconsciously the nucleus of a movement. His grudge against the world was a sincere one. He saw injustice in the simplest consequences of cause and effect. His opinions had not made him a thief; they had merely justified him in his disregard for the law and his obligation to society. Imprisonment had made him neither better nor worse, had merely confirmed him in certain theories. Inconsistently, he loathed his prison associates, men who had been unsupported by his high motives in their felonies. The company of them was contamination. He hated the chaplain; and only one inmate of that terrible place touched what in him still remained tender. That was the old, blind horse who had his stable in the prison, and whose sight seemed to have been destroyed by Providence that he might not witness the degradation of the superior mammals that tramped the exercise ring, or, shackled like beasts, went trudging and shuffling up the hill and through the gates.

He was the one man in the prison who was thankful when the cell door closed on him and the key turned in the lock. The foulness of these old lags, their talk, their boasts, the horrible things that may not be written about * * * he could not think back without feeling physically sick. In truth he would not have stretched out his hand if, by so doing, he could have opened those cell doors and released to the world the social sweepings whom it was his professed mission to save.

A Phone Call

His work finished, he lit a cigarette, fitted it carefully into an amber holder and, adjusting the cushions, lay down on the settee and smoked and thought till the telephone bell roused him and he got up.

The voice that spoke to him was quite unfamiliar.

Nervous Restless Girls!

Cranky? Restless? Can't sleep? Tire easily? Annoyed by female functional disorders and monthly distress? Then take Lydia E. Pinkham's Vegetable Compound, famous for over 60 years in helping such rundown, weak, nervous conditions. Made especially for women. WELL WORTH TRYING!

"Is that Mr. Ingle?"

"Yes," he said shortly.

"Will you make a sacrifice of your principles?" was the astonishing request, and the man smiled sourly.

"What I have left, yes. What do you wish?"

It might be an old friend in need of money, in which case the conversation would be short. For Arthur Ingle had no foolish ideas about charity.

"Could you meet me tonight on the sidewalk immediately opposite Horse Guards Parade?"

"In the park, you mean?" asked Ingle, astonished. "Who are you? I'll tell you before you go any further that I'm not inclined to go out of my way to meet strangers. I'm a pretty tired man tonight."

"My name is"—a pause—"Harlow."

Involuntarily Ingle uttered an exclamation.

"Stratford Harlow?" he asked incredulously.

"Yes, Stratford Harlow."

There was a long pause before Arthur Ingle spoke.

"It's rather an extraordinary request, but I realize that it isn't an idle one. How do I know you're Harlow?"

"Call me up in ten minutes at my house and ask for me," said the voice. "Will you come?"

Again Mr. Ingle hesitated.

"Yes, I'll come," he said. "At what time?"

"At ten o'clock exactly. I won't keep you hanging about this cold night. You can get into my car and we'll drive somewhere."

Ingle hung up the telephone a little bewildered. He was a cautious man, and after ten minutes had expired he put through the number he discovered in the phone directory, and the same voice answered him.

"Are you satisfied?"

"Yes, I'll be there—ten o'clock," he said.

He had two hours to wait. The charwomen did not arrive till nine, for Aileen had purposely fixed this late hour. They had been at the flat during the morning, and she thought it advisable to bring them in after dinner. He gave them their directions, made arrangements for the following day, and went back to the dining room to think out the extraordinary request which Stratford Harlow had made of him. And the more he thought, the less inclined he was to keep the appointment. At last he turned to his writing table, took out a sheet of paper, and scrawled a note:

Dear Mr. Harlow:

I am afraid I must disappoint you. I am in such a position, being a convict on license, that I cannot afford to take the slightest risk. I will tell you frankly that what I have in my mind is that this may be a frame-up organized by my friends the police, and I think that it would be, to say the least, foolish on my part to go any further until I know your requirements, or at least have written proof that you have approached me.

Yours sincerely,

ARTHUR INGLE.

He put the letter in an envelope, addressed it, and marked in the corner in bold letters: "By hand. Urgent." Even now he was not satisfied. He went to the telephone to call a district messenger, but did not lift the receiver. His curiosity was piqued. He felt he must know, with the least possible delay, just why Stratford Harlow had summoned Arthur Ingle, late of Dartmoor convict establishment. And why should the meeting be secret? A man of Harlow's standing would not lose caste, even if he sent for him to go to his house. He came to a sudden resolve, pitched the letter onto the table, and going into his bedroom, changed into a dark suit.

No Frame-Up

By the time he had climbed into his overcoat he was satisfied that he was taking the wisest course. The two charwomen were in the kitchen, and he opened the door to pass his last admonition. The younger of the two was on her knees, scrubbing brush in hand, and he looked down into a long, weak face over which strayed lank wisps of gray-black hair.

"I'm going out. You needn't wait. Finish your work and be here in the morning before 8," he barked, and slammed the door on these inconsiderable members of the proletariat, and went down the stairs in a spirit

of adventure that made him feel almost young.

As the Horse Guards clock was chiming the three-quarters he came into Birdcage Walk and turned along the lonely-footpath that runs parallel with the Horse Guards and flanks the broad parade ground. There was no hurry; he fell into a gentle stroll, fast enough to keep him warm and to avoid any suspicion of loitering within the meaning of the act. A policeman passed him, and he was reminded that he had not reported to the local station, and cursed the system that still held him by a fine chain to Dartmoor.

It could not be a frame-up, he had decided. A man of Harlow's character would hardly lend himself to such a plot, and in his heart of hearts, for all his bitter gibes at the police, he did not believe seriously in the prison legend of innocent men being trapped by cunning police plots.

He looked at his watch under a street standard; it was five minutes to 10, and he strolled back the way he had come, and stopped immediately in a line with the gates that closed the arch of the Horse Guards. As he did so a limousine came noiselessly along the sidewalk from the direction of Westminster. It stopped in front of him and the door opened.

"Will you come in, Mr. Ingle?" said a low voice, and without a word he stepped inside, pulling the door close after him, and sank down on a soft seat by the side of a man who, he at once recognized, was that Splendid Harlow, whose name, even in Dartmoor, symbolized wealth beyond dreams.

The car, gathering speed, turned into the Mall, swung round to Buckingham Palace and across the Corner into Hyde Park. It slackened speed now, and Stratford Harlow began to talk.

For an hour the car moved at a leisurely pace round the circle. Sleet was falling, and before they had gone far the park was deserted. Ingle listened like a man in a dream to the amazing proposition which his companion advanced.

He, at any rate, could listen in comfort. Inspector Jim Carlton, crouched precariously on the back of the machine, had less comfort and far less fortune. The sleet soaked and chilled him, and the microphone attachment that he had fixed by vacuum to the car back failed to carry through horsehair and leather of the back cushion the talk it was so vital he should hear.

Arthur Ingle arrived home at his flat soon after 11. The hired women were gone, and he was glad; dull clods as they were, unimaginative brute people, they might have read and interpreted the light that shone in his eyes or have sensed the exultation of his heart.

Brewing himself some coffee, he

HERE'S BALANCED NOURISHMENT THAT EVERY FAMILY NEEDS

TWO SHREDDED WHEAT . . . A CUPFUL OF MILK . . . FRESH STRAWBERRIES

This meal contains eight vital food values: Three Vitamins (A, B₁ and C), Proteins, Iron, Calcium, Phosphorus and Carbohydrates. You get all these precious elements in one delicious dishful. Give the family this Shredded Wheat treat for breakfast, while strawberries are at their best.

GEMS OF THOUGHT

FAITH

Now faith is the substance of things hoped for, the evidence of things not seen.—Hebrews 11:1.

Through love, through hope, and faith's transcendent dower, We feel that we are greater than we know.—Wordsworth.

All I have seen teaches me to trust the Creator for all I have not seen.—Emerson.

Trust in Him whose love enfolds thee.—Mary Baker Eddy.

Nothing in life is more wonderful than faith, the one great moving force which we can neither weigh in the balance nor test in the crucible.—Harvey Cushing.

Faith and works are like the light and heat of a candle; they cannot be separated.—Beaumont.

Canada's Asbestos

Production Increased 40 Per Cent. To Meet War Needs

Canada is one of the few countries that is blessed with large and workable deposits of asbestos. And that fact was never so pleasant to consider as right now. War is making exceptional demands upon the Canadian asbestos industry, but that industry is bearing up nicely under the strain. Under the strain, that is, of having to increase its output something like 40 per cent. Asbestos production in Canada during January, 1940, amounted to 26,651 tons; in January, 1939, it was a mere 18,780 tons. The fires of war are raging, and where there is fire the protection of asbestos is needed.—Winnipeg Free Press.

The Chicago Field Museum exhibits a fossil elephant tooth weighing seven pounds.

★ YOUNG MEN!

Men with aircraft production, aircraft, and aircraft engine welding and Diesel training are urgently required for work on Canada's wartime program. The fast, intensive courses offered by our allied schools, Hemphill-Diesel, Aero I.T.I. and R.C. Welding are endorsed by the industries, and students are being rapidly absorbed by national industries. Get in touch with us immediately if you are interested in mechanics.

Write us TODAY if possible because we MUST have men we can train to fill this demand.

This is OUR WAR too!

There are no spectators in
this war . . . we're all in it.

No freedom . . . no happiness . . . no contentment is possible for any one of us until this evil thing . . . this worship of brute force is wiped forever from the face of the earth. Not everyone is privileged to wear the King's uniform, but we can all make some contribution to our common cause. We can all buy WAR SAVINGS CERTIFICATES this month . . . next month . . . every month, as long as the war lasts.

IT'S THE LEAST WE CAN DO!

The opportunity to buy WAR SAVINGS CERTIFICATES is the privilege of all Canadians . . . the privilege of helping to win the war.

War Savings Certificates are sold as follows:

For a \$ 5 Certificate you pay \$ 4
For a \$ 10 Certificate you pay \$ 8
For a \$ 25 Certificate you pay \$20
For a \$ 50 Certificate you pay \$40
For a \$100 Certificate you pay \$80

Apply at any Bank, Post Office or other Authorized Dealer.

War Savings Stamps cost 25c each and are sold everywhere. 16 Stamps entitle you to one \$5 Certificate. Every dollar you invest in War Savings Certificates is an investment in security . . . for you . . . for your children.

Buy them regularly every month. It is your continuing responsibility.

WEDDINGS

DYCK-HANSON

A wedding of interest to Didsbury friends took place in Portland, Ore., on June 30th, when Rose Alice Hanson, of Portland, became the bride of Mr. A. Dyck, son of Mr. and Mrs. A. B. Dyck, Didsbury.

Mr. and Mrs. Dyck will reside in Portland, where the bridegroom will continue his studies in voice culture and music at Cascade College.

LEARMONTH-KERCHER

The marriage of Gladys Irene, third daughter of Mr. Edward Kercher and the late Mrs. Kercher, to Andrew John Learmonth, son of Mr. and Mrs. A. J. Learmonth of Redcliff, Alberta, took place in Calgary on June 29th at 5 p.m. in Central United Church, Rev. A. Melville Aitken officiating.

Mr. and Mrs. Learmonth will reside in Calgary.

BURNELL-HUGHES

A wedding of interest to friends in Didsbury and district took place in Toronto on June 17th, when Miss Mary Hughes, formerly of Didsbury, became the bride of Mr. E. P. Burnell of Swift Current, Sask.

After a short honeymoon in Montreal, Que., Thousand Islands and other points in Ontario, Mr. and Mrs. Burnell will reside in Swift Current, Saskatchewan.

DYCK-HAYDAMACK

The M.B.C. Church was the scene of a quiet, lovely wedding on June 24th, when Mary Evelyn, daughter of Mr. and Mrs. F. Haydamack, of Esther, Alberta, was united in marriage to Mr. J. A. Dyck, son of Mr. and Mrs. A. B. Dyck, Didsbury.

The bride, gowned in ivory satin and carrying a bouquet of roses, entered the church on the arm of her brother, John Haydamack of Turner Valley. Mrs. H. A. Traub, of Sunnyslope, played Lohengrin's wedding march.

The bride was attended by her sister, Violet Haydamack of Red Deer, dressed in a petal-rose gown and carrying a bouquet of roses. The groom was supported by Mr. Peter Waldin.

Following the ceremony, performed by Rev. C. J. Hallman, Mr. B. Dyck rendered a solo, "The Sweetest Song."

About 85 guests gathered at the home of Mr. and Mrs. A. A. Dyck, where a delicious buffet-lunch was served. After the reception, at which the happy couple gave acknowledgment for the many useful and beautiful gifts, they left for a brief honeymoon, the bride wearing a smart ensemble in wine shade, with grey topcoat.

Mr. and Mrs. Dyck will take up pastoral work in Alsask, Sask., and our best wishes attend them.
